30W Waterproof Horn Speaker RH-HS43

In general, compared with the frequency division box, ordinary inverted phase full frequency box, TQWT full frequency box, large baffle and other sound boxes, it is worthwhile to use a sound box with full frequency and horn to listen to music. Although the full frequency horn sound box is a bit heavy, it is common that a big horn has weight of dozens of or hundreds of kilograms.

The waterproof horn speaker is a kind of high quality replay boxes. Although the sound distortion and box sounds of baffle are smaller, if you want to achieve the same low frequency submergence and sense of quantity as the full frequency horn, the size of the baffle should be extremely large, and the demand for the loudspeakers should be relatively higher, thus, in fact, the cost will be more higher. Therefore, the full frequency horn is worth playing, it can bring good sense of hearing, its sound quality will not let you down as long as you debug it well!

It is suitable to use the tube amplifier to amplify the full frequency horn to polish the high frequency slightly and make the music more comprehensive. Except heavy hifi lovers, the full frequency horn is not suitable to be amplified by the tube amplifier, because the horn box itself is more or less with some sound distortion.

RH-AUDIO 30W Waterproof Horn Speaker RH-HS43 is made of ABS plastic enclosure and metal installation bracket, can withstand the outside elements better than the cone type speaker, making the horn speaker popular for outdoor PA use.

They are far more efficient, you receive more sound volume at a lower wattage, which also reduces both the size and power requirements of your amplifier.

The Features of [30w Horn Speaker](#)

- ※ With IP66 rated, whether on vehicles, boats or in exposed outdoor installations.
- ※ All are fitted with a sturdy, adjustable mounting bracket.
- ※ The horn speaker has built-in transformer which suits both 70V and 100V high-voltage commercial audio distribution systems and public address system.

The Specification of [Waterproof Horn Speaker](#)

Model	RH-HS43
Rated Power	30W
Line Voltage	100V
Frequency Response	400Hz-6KHz
Sensitivity(1w,1m)	108±3Db
Dimension	285*205*280mm
Finished	White
Material	ABS enclosure, alloy bracket
Net Weight	2.0kg
Gross Weight	2.3kg
